

BrightView

Shawn A. Ryan, MD, MBA, ABEM, FASAM **President & Chief Medical Officer**

Dr. Shawn Ryan originally trained as an emergency physician at the University of Cincinnati and simultaneously obtained his MBA while completing his residency. For over 12 years, Dr. Ryan has practiced in the Greater Cincinnati area, and for part of that period, he functioned as a hospital administrator (Department Chairman of Quality and Patient Safety). During this time, he became acutely aware of the issue of heroin/opioid abuse in the region and for the past 7 years has been working tirelessly to make a difference in his community. Dr. Ryan serves on many regional, state, and national committees/workgroups focused on turning the

tide of this epidemic. He is the immediate-past president of the Ohio Society of Addiction Medicine and the current Chair Legislative Advocacy for ASAM.

Dr. Ryan is very excited to continue to work in the field of addiction medicine and to have the opportunity to substantially impact the treatment needs of our region.

Dr. Ryan is one of the founders of BrightView and is responsible for strategic development, alignment of operations and medical practice, clinical and outcomes research, and maintaining focus on the mission and vision of the company. He is both a board-certified addiction specialist and emergency physician.

BrightView is an outpatient addiction medicine practice dedicated to helping patients heal physically, mentally, and emotionally through medication assisted treatment (MAT), individual counseling, group therapy, and social services support.

Since opening in 2015, BrightView's approach to addiction medicine has been based on evidence and clinical best practices. The outpatient treatment plan works seamlessly with patients' daily life commitments. To ensure everyone receives the care they need, BrightView accepts all insurances, Medicaid, and Medicare.
